Mrs. Kate's Mindfulness Project

Byline: Jordyn, Gracie, and Rose

Mrs. Kate

On January 16th, we interviewed Mrs. Kate. We wanted to know what she has been doing in class, around mindfulness. We asked her how is your mindfulness project going?" she responded by saying "her class is researching fixed mindset versus growth mindset". We then asked her "What have you learned in this class" Mrs. Kate responded with "It is important to teach kids about growth mindset and what it is".

Comics -

This is a comic about a Bee named bizzy. One day He wanders into TVs and into the pollinator project in the garden.

B E E & L E A F I C O N

T V S

"I smell
something
yummy."

“I’m Bizzy, is there anyway I can help?”

“Hi Bizzy the bee. I’m miss Lena, you can help by being a pollinator.”

“Tell me a fun fact about pollinators Please. “

“One amazing fact about pollinators is that they are responsible for about one in every three bites of food we eat,”

All About the Hoverfly

*Byliner: Raylene T.
Created on: 1/6/26*

ARTICLE CONTENTS:

- 01. Who is the hoverfly?
- 02. What is the importance of a hoverfly?
- 03. When is the hoverfly active?
- 04. What flowers is the hoverfly attracted to?
- 05. What is a hoverflies diet?
- 06. Are hoverflies harmful?

Who is the hoverfly?

The hoverfly is a very interesting and an important pollinator. The hoverfly is a pollinator located worldwide. The hoverfly is actually very small, you can see this insect with a 10x magnifying glass. You saw what a hoverfly looks like in the title, but here it is on this slide!

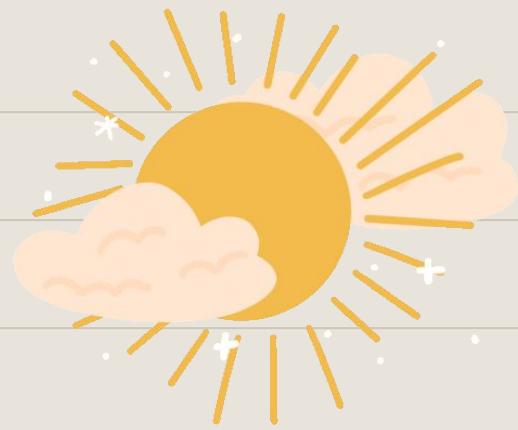

They kind of look like yellowjackets now

What is the importance of a hoverfly?

The hoverfly is important for ecosystems and agriculture.

They're also great for plant reproduction and overwhelmingly beneficial for gardens!

When is the hoverfly active?

The hoverfly is active during the day and hoverflies love a nice sunny day! I bet they just want a nice cold treat on those hot summer days!

What Flowers is the Hoverfly Attracted to?

- Hoverflies are mainly attracted to flat, open flowers that are easy to get nectar from.

Specifically:

Purple Poppy Mallow

Cilantro

Yellow Toadflax

- Marigold

Foxgloves

The main color they're attracted to is yellow.

What is the diet of a hoverfly?

Adult Hoverflies Normally eat Nectar and Pollen,. Babies eat stuff like aphids and mites. Some babies are decomposers and eat fungi. Different types of hoverflies have different needs, but this is the main stuff they eat. They also like sweet flower liquids.

Are Hoverflies Harmful?

No! Not at all! Like I said in a recent slide,
they're actually great for the environment!

We should protect and keep them safe
actually!

Ending & Citations:

Thank you for reading my article about hoverflies! It means a lot to me actually, I worked hard on this to make sure the information was accurate and simple to understand.
